# Docker : Docker MasterClass for DevOps

Docker : Why Docker Matters

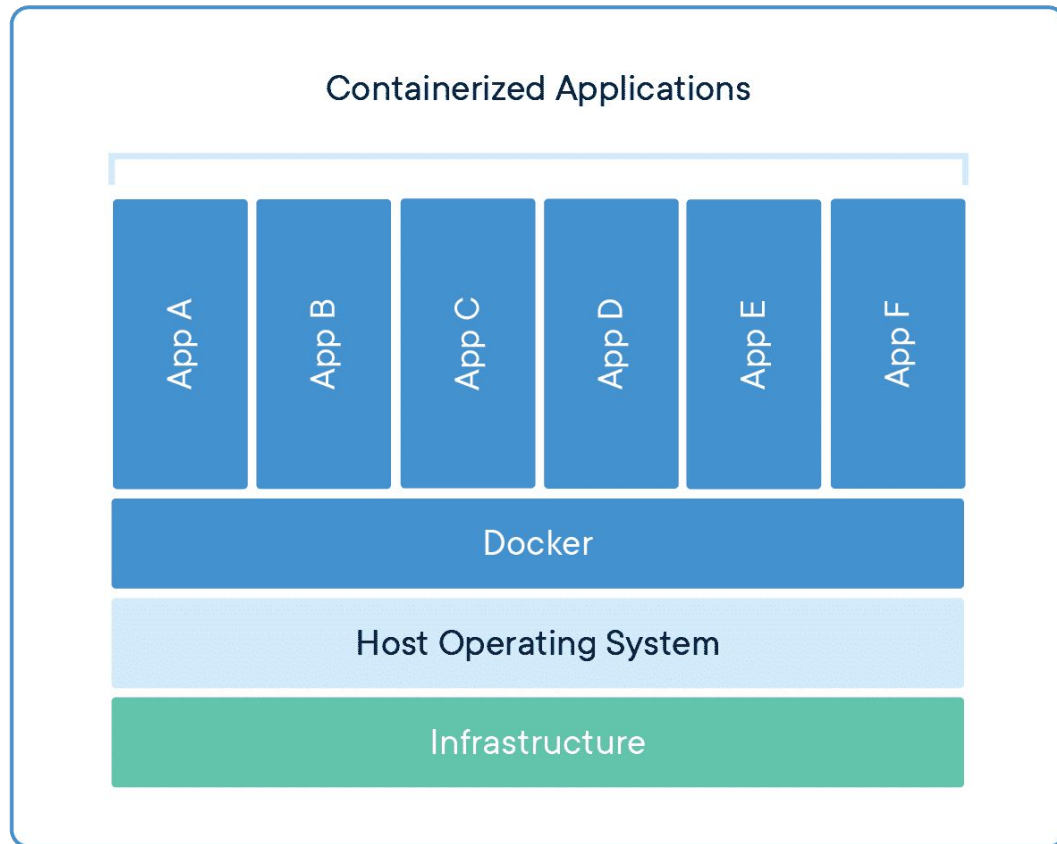

# Docker : Service Containers

- **Why Docker matters for Devs ?**
- *"But it was running on my machine!"*. Every developer has said this in his/her life while shipping his/her app to a friend or an app tester.
- Docker helps Devs to solve these problems, and provide system independent Run-time Environment for Apps.
- Reasons to Adopts Docker -

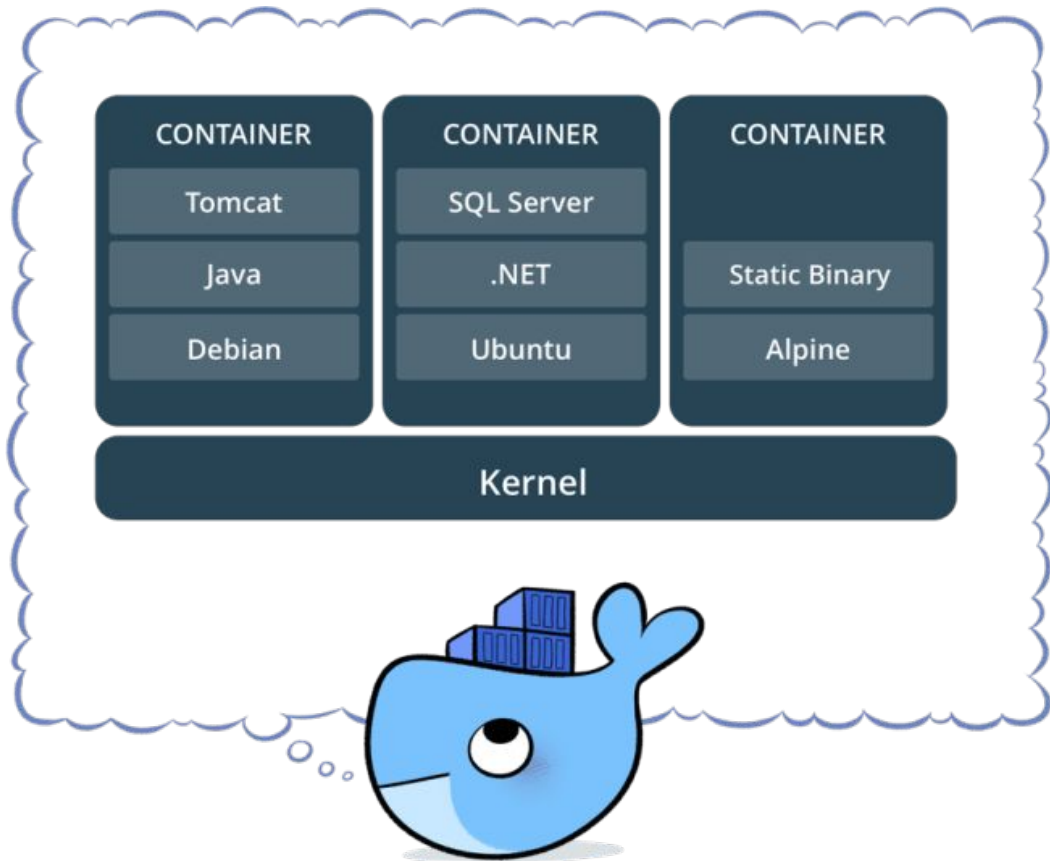

# Docker : Service Containers

- Reason #1:  
Environment Isolation

# Docker : Service Containers

- Reason #2:  
OS Independent Apps

# Docker : Service Containers

- Reason #3: Rapid Development & Deployment
- Reason #4: Scalability & Flexibility Made Easier
- Reason #5: No More Security Issues
- Reason #6: Ship Anytime, Anywhere
- Reason #8: Dependency Management Made Easier
- Reason #9: In-Built Version Control System

# Thank You...

Don't be the Same! Be Better!!!
